GRADE 10 / Life Orientation / English

Set a goal you can act on

01 Understand

Learning goals: Turn an aspiration into an action • Identify support and constraints • Review progress without self-judgement

A useful goal names a specific action and a realistic time frame. Link it to something you value rather than comparing yourself constantly with others.

Planning includes barriers such as transport, data, responsibilities and access to a quiet space. Choose supports that fit your situation.

Review what happened, identify an obstacle and adjust the plan. Reflection is evidence for a better next step, not proof of your worth as a person.

From aspiration to a weekly action

Stage	Example	Check
Aspiration	improve maths confidence	why it matters
Action	practise three factorising questions on Tue/Thu	time and place
Review	check answers on Friday	identify one error to discuss

02 Follow the reasoning

A learner wants to “do better” but has limited data. Turn this into a workable one-week plan.

1. Choose a small topic and download or print questions when Wi-Fi is available.

2. Set two short practice sessions and a Friday answer check, allowing for other responsibilities.

3. Ask a tutor or teacher about one specific error; adjust next week’s plan using the result.

GRADE 10 / Life Orientation

Practise with purpose

03 Try before checking

Use paper or your notebook. Show your reasoning. For written responses, use evidence and explain your choices. Suggested time: 15–20 minutes.

1. Rewrite “I will study everything tomorrow” as a realistic action.

2. Name one support besides paid tutoring.

3. What should you do if the first plan was unrealistic?

04 Check and correct

1. For example: complete three algebra questions after school on Tuesday and check them on Wednesday.

2. A teacher, peer study group, school library or trusted adult.

3. Identify the barrier, reduce or reschedule the action and review again.

Common mistake to avoid

A plan is not effective merely because it is ambitious. It needs feasible actions, support and a way to review progress.

Reflect and revisit

Identify one correction in your own words. Attempt a similar question tomorrow without looking at the guide. If you are still unsure, take your attempt to a teacher or tutor.
